

AUSTIN HUTCHEN

323-283-1434 | hutchencodes@gmail.com

Skills Summary

I'm a SWE/CS student & full-stack dev hobbyist with experience in (c/rust/c++) embedded systems as well as JS and TS – based web frameworks, including React, Next.js, React Native, and Flutter.

Education

BSCS Computer Science, Class Of 2026

I have experience working directly with engineering department faculty for on-site calculus teaching responsibilities, detailed further on my website.

Experience

University Of Colorado Boulder

Course Assistant / February – May 2023

Taught and assisted with CALCULUS 2 (MATH 2300) alongside faculty at CU boulder. Also held office hours every week to assist learning of course material. Recieved 97% positive feedback from 103 participants on end of semester survey, and letter of recommendation from math PHD student & teacher (You can see this on the “accreditations” page of my site)

Awards and Acknowledgements

My Projects

See 10 of my handmade embedded systems projects including an automatic ESP-32 plant waterer app, a C++ text editor, a kernel shell, and much more!
